

# Espree X-Large Opening MRI

## A Patient's Guide

Radiology Ltd.

### Radiology Ltd. offers a better choice in “open” MRI

The open design of the Magnetom Espree accommodates patients of all sizes and helps eliminate anxiety and claustrophobia. For many exams, feet go into the system first and the head remains outside of it, a first in “open” MRI. Most importantly, the image strength and clarity is three times greater than the conventional “open” MRI scanners, assuring that you receive high-quality images and the most accurate diagnosis.

### Provide a better experience for patients

- Comfort: Feet go in first and head remains outside the scanner (for most exams)
- Space: 70 cm opening and 30 cm (approx. 1 ft.) between face and scanner
- Easy access: Scanner table lowers to a comfortable 18” from the ground

### Accommodate patients with special needs and conditions

- Pain and mobility issues
- Respiratory problems
- Claustrophobia
- Anxiety

### The Espree provides more features than conventional “open” MRI scanners

- 1.5 Tesla magnet strength—three times the power of conventional open MRI scanners
- Increased weight limit capabilities (up to 550 lbs. depending on exam)
- Better contrast and resolution
- Shorter exam times

The Espree MRI suite at Radiology Ltd. Wilmot Center for Diagnostic Imaging & Treatment.

### The Espree is available for patients at two Radiology Ltd. locations

Radiology Ltd. Wilmot Center for Diagnostic Imaging & Treatment  
677 N Wilmot Rd.

Radiology Ltd. La Cholla Center for Diagnostic Imaging & Treatment  
5960 N. La Cholla Blvd.

Allows for more comfort and flexibility with a shorter 4 ft. magnet.

The Espree is unique in patient access and comfort

Provides more space - 70cm with 30cm of open face space. Offers more comfortable imaging options for patients with special needs.

Reports are available on Radiology Ltd.'s patient portal, MyRad.
