Memorial Day
Monday, May 29, 2017

Independence Day
Tuesday, July 4, 2017

Extended Hours for X-ray

Wilmot Center for Diagnostic Imaging and Treatment

Walk-in X-ray Available
Monday - Thursday
8AM-5:45PM

La Cholla Center for Diagnostic Imaging and Treatment

Walk-in X-ray Available
Monday - Thursday
8AM-5:45PM

Saturday Morning Mammos

If your patient has busy weekdays and finds it difficult to schedule their yearly screening mammogram, we have Saturday morning appointments available.

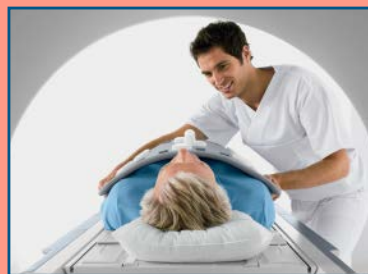

Give our Scheduling Department a call at (520) 733-7226 to schedule their very important yearly exam.

3T Multiparametric Prostate MRI

Radiology Ltd.'s new 3T high-field strength open-bore MRI scanner allows for exceptional imaging of small anatomic structures. This is particularly relevant for detailed imaging of the prostate gland.

Using 3T MRI and an organ-specific protocol, prostate cancer is more accurately diagnosed and staged, allowing more precise presurgical and prebiopsy planning. Better treatment planning through improved prostate imaging may help avoid posttreatment complications of urinary incontinence and impotence.

We also provide authorization assistance for prostate exams.

Weekend MRI

Five of our Radiology Ltd. locations are open for weekend MRI appointments. If your patients need to schedule an MRI, please call our Scheduling Department at **(520) 733-7226**.

Wilmot Center for Diagnostic Imaging & Treatment
677 N. Wilmot Rd.

La Cholla Center for Diagnostic Imaging & Treatment
5960 N. La Cholla Blvd.

Midvale Imaging Center

St. Joseph's Imaging Center
330 N. Wilmot Rd.

Camp Lowell Imaging Center
4640 E. Camp Lowell Dr.

CT Lung Cancer Screening Program

Based on these results, national guidelines recommend annual low dose CT Lung Cancer Screening for:

- **Smokers** age 55 to 77 years who have smoked for 30 pack-years or more (Pack-year smoking history is calculated by multiplying the number of years you have smoked by the number of packs you smoke a day).

- **Former Smokers** age 55 - 77 years who quit smoking less than 15 years ago and smoked 30 pack-years or more.

Welcome to the Radiology Ltd. Team!

Miriam G. Emerson, M.D.
Radiology Ltd. is proud to introduce our new Pediatric Radiologist, Dr. Miriam Emerson. A graduate of the University of Arizona College of Medicine, Dr. Emerson completed a residency in Diagnostic Radiology at the University of Arizona and then a fellowship in Pediatric Radiology at Lucile Salter Packard Children's Hospital and Stanford University Medical Center.

Christine N. Eppelheimer, M.D.
Radiology Ltd. is proud to introduce our new Breast Imaging Radiologist, Dr. Christine Eppelheimer. A graduate of the University of Arizona College of Medicine, Dr. Eppelheimer completed a residency in Diagnostic Radiology at Mount Sinai Beth Israel and then a fellowship in Body and Breast Imaging at North Shore University Hospital and Hofstra Northwell School of Medicine.

Please join us in welcoming Drs. Emerson and Eppelheimer! We are excited to have them as a members of the Radiology Ltd. team.

RadVision Provider Portal

Referring providers and staff can access important information, all in one place.

Benefits Include:

- One click report view
- Quick view of patients' entire Radiology Ltd. history
- Ability to add notes when changing status
- The ability to create your own workflow
- Express ordering feature
- Access to your images
- Customize your home screen to what works best for you
- Patient scheduling status

Annual Screening Mammography #StartAt40

Radiology Ltd. stands firmly behind its recommendation that women should receive yearly mammograms starting at age 40 in order to receive the maximum benefit from breast cancer screening.

What is PET/CT?

PET/CT combines the fine structural detail of CT with PET's ability to detect changes in cell function. This combination allows for earlier and more accurate detection of disease than either CT or PET alone. PET/CT can often detect small cancers before they are apparent on other types of exams because many cancers use glucose as their primary fuel. PET/CT images supplement the information obtained from conventional studies such as CT, MRI, and Ultrasound.

PET/CT exams are available at our Camp Lowell Imaging Center.

Updated Ordering Guide is now here!
